

Collonnade Coffee Table

Inspired by the rhythm and structure of classical colonnades, the Collonnade Coffee Table pairs architectural influences with organic materials. Shown with a Black Walnut live edge top and Maple turnings, this piece balances sculptural form with traditional craftsmanship.

The live edge top features a graceful curved end, supported by a series of turned maple columns and matching steam-bent maple feet. Through-top wedged tenons showcase the joinery as a design element, creating a table that feels both refined and distinctive.
